Armed Sikhs occupy Golden Temple in Amritsar, India. The Golden Temple in Amritsar serves as the most important house of worship for the Sikhs. Originally built in 1604, the temple sustained repeated damage from attacks by Afghan invaders. During the early 19th-century reign of Maharaja Ranjit Singh, the temple was rebuilt using marble, copper, and an overlay of gold foil. The temple sits on a small island and connects with land on the west by way of a marble causeway.
